

inspirit

Experience the Future of Education

Inspirit combines the latest AR/VR technology with research-based instructional practices in order to create a depth of understanding that is not possible without the technology.

Inspirit Innovative Hub

The Inspirit Innovative Learning Hub is the only platform where educators can access standards aligned STEM and career content on multiple devices with one affordable subscription.

- Aligned to national & state standards, SAT/ACT prep
- Interactive STEM models accessible on the web & in augmented reality
- AR mathematics manipulatives and experiences
- Over 50 STEM simulations for middle & high school for the web and VR
- Career discovery & career pathway simulations

Professional Development

Benefit from unparalleled training provided by our experts in immersive education, specializing in the deployment of innovative technology tailored to your school's specific needs.

We not only introduce cutting-edge technology but also ensure its effective integration, guided by best practices and our extensive experience in educational technology implementation.

PREMIUM OFFERING

"Add-On to Inspirit base plan- expanding the core offering"

CTE Training

Cutting-edge technology makes skill training scalable, intuitive, faster, customizable, and cost-effective. Learners have access to live feedback and detailed assessments.

CTE Pathways:

- Welding
- Painting
- HVAC repair
- Solar

Inspirit Partners

We are backed by leading researchers at Stanford University as the industry experts for integrating and adopting innovative technology and curriculum for education
